

Dura

Managing a vehicle fleet with Traka21

traka

ASSA ABLOY, the global leader
in door opening solutions

Case Study

Dura originated the fitted garage concept in 1997 and to this day remains Europe's market leader. Dura's bespoke range of garage cabinets, garage flooring and garage storage solutions can help to create a perfect interior for the fit out of what can often be a forgotten room. Their award winning range of fitted garage cabinets enable customers to create a flexible solution that is useful, safe for all of the family, is designed to the highest standards and is manufactured in the UK.

Requirement

Due to such a high demand for their products, Dura have an ever increasing fleet of company vehicles. It has therefore become paramount for them to find a hassle free way of tracking their vehicles that is fundamentally more reliable and secure than traditional pen and paper tracking via a vehicle register.

Why Traka21

Traka21's innovative plug and play system provides Dura with the very latest in intelligent key management. Simple, efficient and cost-effective, Traka21 helps trace and account for every key or keyset, which are individually locked in place, ensuring that critical business operations are never jeopardised. As well as having a comprehensive tracking system for the vehicles usage, Dura are able to create easy to use reports that can then be used to monitor specific details of vehicle usage. The reports show which staff members used each vehicle, as well as how long, therefore enabling Dura to identify peak usage.

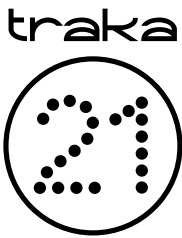

“Our experience of Traka21 so far has been nothing but positive. The system is incredibly easy to use, saving us time and money, as there are no paper forms to fill in. It provides us with extensive reports that we can analyse and use in the monitoring of our vehicle strategy”

George Wilkes, Dura Garages Warehouse & Operations Manager

DURA[®]
Fitted Garage & Workshop Systems

Traka21's innovative plug and play system provides small to medium size businesses with the very latest in intelligent key management.
