

Mansfield Medical Centre

Keys stored securely, managed effectively and available 100% of time

traka

Case Study

Mansfield Medical Centre offers a wide range of health services to patients from their surgery in Coventry. Their team of doctors and nurse take great pride in the care they provide, actively engaging in the NHS Patient Participation Group, ensuring that patients are involved in decisions about the range and quality of services provided and, over time, commissioned by the practice.

Requirement

Mansfield Medical Centre wanted to create standardised processes surrounding keys, including the daily lock up, access to drugs cabinets and out of hours access. In addition to these core requirements, they also needed a way to record access to keys and identify the current user of particular keys, improve efficiency and reduce the amount of time lost searching for keys.

Why Traka21

Traka21's innovative plug and play system provides the practice with the very latest in intelligent key management. Simple, efficient and cost-effective, Traka21 helps trace and account for every key or keyset, which are individually locked in place, ensuring that critical business operations are never jeopardised. Mansfield completed a full review of their processes prior to installing Traka 21, which dramatically improved effectiveness. Their keys are now stored securely, managed effectively and available 100% of time to members of staff.

Following the introduction of Traka21, approximately 30 redundant keys were identified as part of a process review, which were then removed from the system.

“Process efficiency and staff morale has greatly improved since we installed the cabinet at the surgery. Traka 21 has become a ‘seamless’ and ‘accepted’ benefit”

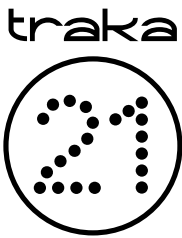

Dr Smith, GP Partner, Mansfield Medical Centre

“This is a brilliant concept that means all our keys are now organised. The system has become second nature and we’re no longer searching for keys”

Lynn Lennon, Practice Manger, Mansfield Medical Centre

“Everyone is now responsible for owning the keys they take and know they are accountable for returning them. I’m so pleased not to hear people shouting across the office on a daily basis ‘who’s got the keys for such and such’”

Sue Mills, Office Manager, Mansfield Medical Centre

Traka21's innovative plug and play system provides small to medium size businesses with the very latest in intelligent key management. Simple, efficient and cost-effective, Traka21 helps trace and account for every key or keyset, which are individually locked in place, ensuring that critical business operations are never jeopardised.

Operation

- Stand-alone Plug & Play solution with advanced RFID technology
- Touchscreen interface
- PIN access to designated keys or keysets which are individually locked in place
- Keys are securely attached using special security seals
- Simple to configure through setup wizard
- No requirement for network connection or PC
- Concealed robust fixing points allow secure wall fixing
- Mains operated with optional battery backup

Features

- User, key and access rights administration
- Multilingual functionality
- Screen based audit trail and reporting capability or export via USB port
- 21 robust, long-life iFobs with security seals
- 21 locking receptors with LEDs
- Robust and compact aluminium & ABS housing with no exposed hinges or obvious access points
- Manual override and door release functions in case of emergency
- Audible alarms

Traka21 specifications

Cabinet dimensions:	(H)427mm x (W)246mm x (D)95mm
Weight:	3.94kg
Power supply:	Input: 100-240V AC, Output: 15V DC
Battery backup:	DC12v 1.2Ah (optional)
Power:	15v 0.7amp max
Operating temp:	Ambient, for indoor use only (-5°C to +50°C at 95% non-condensing relative humidity)
Mounting:	Wall
Key positions:	21
Users per system:	1,000
Interface:	PIN only
Certifications:	CE, FCC, IC
